Maintenance

Line Maintenance Checklist
Here I offer a line maintenance checklist for download **now in english**, which I originally created for training courses.

line-check-list-912-914-de_08-2026.pdf

— the complete PDF

It is summarized for all 912s and 914s and is based on the manufacturer's current checklists.
I will update the checklist if the manufacturer's documentation changes or if additions are required in practice.
Please note the revision status.
The current revision status is from August 2026
Please do not use older revision statuses prior to January 2026! The status can be seen in the footer of the list.
